# HTML 2.0 Materials

The HTML 2.0 specification RFC 1866, is a product of the HTML Working Group of the IETF, edited by Dan Connolly.

## RFC 1866. Proposed Standard

### "HyperText Markup Language Specification -- 2.0"

T. Berners-Lee and D. Connolly, November 1995.

#### Abstract

The Hypertext Markup Language (HTML) is a simple markup language used to create hypertext documents that are platform independent. HTML documents are SGML documents with generic semantics that are appropriate for representing information from a wide range of domains. HTML markup can represent hypertext news, mail, documentation, and hypermedia; menus of options; database query results; simple structured documents with in-lined graphics; and hypertext views of existing bodies of information.

HTML has been in use by the World Wide Web (WWW) global information initiative since 1990. This specification roughly corresponds to the capabilities of HTML in common use prior to June 1994. HTML is an application of ISO Standard 8879:1986 Information Processing Text and Office Systems; Standard Generalized Markup Language (SGML).

The 'text/html' Internet Media Type (RFC 1590) and MIME Content Type (RFC 1521) is defined by this specification.

Network Working Group  
Request for Comments: 1866  
Category: Standards Track

T. Berners-Lee  
MIT/W3C  
D. Connolly  
November 1995

The published RFC is the same in content as the September 22 draft, which is available here in several formats:

- *Hypertext Markup Language - 2.0* (HTML hypertext)
- postscript, (not A4 paper any more.)
- gzip'd postscript
- TeXinfo,
- distribution: gzip'd tar file (243756 bytes. md5: efc501e64953971e3569721f1311391. PGP signature. PGP key)

For folks that want to play around with the SGML source: It uses a document type by Gary Houston called Snafu. His GF: General SGML Formatter package includes this DTD and a few others, and some nifty tools to build TeXinfo, RTF, etc. from SGML documents.

## Background, history

HTML 2.0 Public Text

1976

Current DTD, SGML Declaration, and other "SGML code"

## SGML

stuff

### Connolly's HTML Design Notebook

Getting kinda old by now.

### "Character Set" Considered Harmful

A discussion of terminology related to coded character sets and character encoding schemes.

Aug 8 draft

- distribution: gzip'd tar file

Aug 4 draft

- distribution: gzip'd tar file

June 15 draft

- gzip'd tar of the whole release

May 6 internet draft: Hypertext Markup Language - 2.0 (130423 bytes)

@@

For example, try this search for HTML in The Collection of Computer Science Bibliographies.

See also:

Archives of the www-talk and www-html mailing lists

for details of the early development of HTML.

### About the Web

which contains background and history of the web project.

This is a timeline of publication events for HTML:

Nov 1995

HTML 2.0 becomes IETF Proposed Standard

This is an effort to create a specification for interoperability among implementations of HTML. See also: IETF HTML Working group (closed in 96).

March 1995: HTML 3.0 internet draft

"provides additional capabilities over previous versions such as tables, text flow around figures and math."

### A review of the HTML+ document format

David Raggett

Computer Networks and ISDN Systems, 27(2), pp. 135-145, November 1994.

(BibTeX)

PostScript, Size: 847238, Printed: 10 pages from Preliminary Proceedings at CERN

26 July 94 WWW IETF BOF Toronto

25 July 94 HTML-IG Toronto

HTML 2.0 July 1994 draft: Berners-Lee, Connolly, Muldrow

The HTML specification was rewritten for consistency and usability by Karen Muldrow at HaL over the summer of 1994. Dan Connolly presented the draft at the Toronto IETF meeting, where the HTML working group was formed.

1994 April: HTML test suite; Dan Connolly

The internet draft spec for HTML expired, and there has been a lot of noise about a new spec. I've collected a test suite of HTML documents and created a DTD to parse them (with a few minor tweaks.)

Included are DTD for HTML that reflects current practice, along with a whole mess of HTML files

276

I got from various places to test it out. This stuff has not been prepared for distribution, but you can check out the Makefile for clues.

Toward Closure on HTML

1994/04/07

This document was generated using the texi2html translator version 1.36.

directory. The file general.info there is a master document describing all forms, and the directory also contains smaller pieces pertaining to specific forms. If you are using the ftp interface, you would type:

```
ftp> ascii
ftp> cd forms
ftp> get general.info
```

### Getting the Actual Text Files

The indices contain the names of the text files. For example, the index might contain the following file name:

```
data/99830/0000099830-94-000037.txt
```

If you are using the anonymous FTP interface, you would login as "anonymous", change to the edgar directory and issue the following command:

```
ftp> ascii
ftp> cd data/99830/
ftp> get 0000099830-94-000037.txt
```

### Webmaster Note

FTP users should also see the [recent Notice](#) on the restructuring of the website EDGAR data.

### Direct Bulk Feed of EDGAR Data

As of November 1, 1998, the data dissemination service is being operated by TRW Inc. Contact them for more information:

Craig Odell  
Tel.: (703) 345-8675

See also the [EDGAR Modernization page](#), which has a section on proposed rates for data subscribers.

### Help With Questions About EDGAR

We will make every effort to answer general queries about the EDGAR system as soon as possible if they are directed (via electronic mail) to [webtech@sec.gov](mailto:webtech@sec.gov). Note that this mailbox is for EDGAR-related queries only. To request information on other Commission programs, see the SEC's [electronic mailbox listing](#).
